

*The graph above shows the actual ecological flow data-the amount of water left to the Paravani River from Paravani HEPP for July 2023.*

*The minimum permitted ecological flow of Paravani HEPP is 1,75 m3/sec.*

*The increased flow for the dates 01st, 02nd, 03rd, and 04th of July, was due to stop at generation, when no water was drawn to intake. The increased flow for dates 05th, 08th, 10th, 17th and 25th of July was caused by the emergency stoppages of Akhalkalaki 1 and Akhalkalaki 2 HPP.*
