

*The graph above shows the actual ecological flow data-the amount of water left to the Paravani River from Paravani HEPP for May 2019.*

*The minimum permitted ecological flow of Paravani HEPP is 1,75 m<sup>3</sup>/sec.*

*The increased flow for the dates 2<sup>nd</sup> and 22<sup>nd</sup> of May were due to stops at generation, when no water was drawn to intake.*

*The increased flow for other days of May were due to seasonality effect, when the amount of water at intake was more than the Plant's capacity.*
