

*The graph above shows the actual ecological flow data-the amount of water left to the Paravani River from Paravani HEPP for May 2021.*

*The increased flow for the dates 1-6th, 9th, 12th, and 14th of May was due to seasonality effect, when the amount of water at intake was more than the Plant's capacity.*

*The minimum permitted ecological flow of Paravani HEPP is 1,75 m3/sec.*
